Professional Summary

Computer Science graduate and Full-Stack Developer with hands-on experience in building scalable web applications using both MERN Stack and ASP.NET Core technologies. Skilled in developing RESTful APIs, authentication systems, and responsive front-end interfaces using Node.js, Express.js, MongoDB, React, Next.js, and SQL Server. Experienced with modern development tools and cloud technologies including Redis, MongoDB Atlas, Firebase, Git, and Postman. Passionate about backend engineering, problem-solving, and building efficient, user-focused applications through real-world projects and collaborative environments.

Work Experience

Backend Developer Intern — Kafana.Tech (Oct 2025 – Jan 2026)

- Developed and maintained RESTful APIs using .NET Core and Entity Framework.
- Assisted in debugging and resolving technical issues to improve system performance
- Collaborated with team members to ensure smooth integration between frontend and backend systems
- Provided technical support and assistance during development and testing phases.

Full Stack MERN Trainee — Dot Jordan (2026)

- Developed full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Built RESTful APIs and implemented secure authentication systems using JWT.
- Worked with MongoDB Atlas for cloud database management.
- Developed responsive user interfaces using React, Vite, and Next.js.
- Applied backend development concepts including middleware, API handling, and asynchronous operations.
- Collaborated in practical development projects and real-world application scenarios.

Education

Al-Zaytoonah University of Jordan, Amman, Jordan

2021-2025

B.A in Computer Science | GPA rank: Very Good

PROJECTS

Event Booking Web Application

- Developed a full-stack web application using ASP.NET Core MVC and SQL Server
- Implemented authentication system with multiple roles (Admin, User, Hall Provider)

- Designed responsive UI using HTML, CSS, JavaScript, and Bootstrap
- Built features for hall management, booking system, and dynamic content handling

Authentication & OTP Verification System

- Developed a user registration and authentication system using Node.js, Express.js, MongoDB, and Redis.
 - Implemented OTP verification with Redis for temporary storage and expiration handling.
 - Applied JWT authentication, route protection, and secure password encryption.
-

Skills

● Technical Skills:

- **Front-End:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Vite, Bootstrap, Tailwind CSS, Sass (SCSS), jQuery, Responsive Web Design
- **Back-End:** Node.js, Express.js, ASP.NET, Core (C#) Entity Framework, RESTful APIs, Authentication & Authorization (JWT)
- **Database:** MongoDB, MongoDB Atlas, SQL Server, Oracle, Redis, Firebase
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Figma, Canva.

● Additional Skills:

- Problem Solving & Debugging
 - Team Collaboration
 - Technical Support
 - Communication Skills
 - Time Management
-

Courses

- **Soft Skills Training — Get into Tariqi — (2025)**
- **Quality Assurance for Mobile Applications and Website Sector – Get into Tariqi in (2025)**
